

Clean technology – features that do a better job

The newest washing machine features improve green performance and save you money. Get acquainted with the latest technology...

FAST SPINS

Rapid spin cycles, ranging from 1200rpm - 1800rpm, save drying time and energy.

HALF-LOAD

A programme designed for smaller loads that uses less water and energy.

INTELLIGENT TECHNOLOGY

Monitors the load adjusting the programme for best results with minimum waste of water and electricity.

SILENT TECHNOLOGY

Minimises noise during the wash cycle.

STEAM TECHNOLOGY

A system that releases steam during the cycle relaxing the fibres and helping the detergent to penetrate.

TIMER DELAY

Timer that can be set to start the wash cycle at night when electricity rates are cheaper.
